

IBSBI 2014

2nd INTERNATIONAL CONFERENCE ON BRIDGES

The **Hellenic Society of Bridges Study** (H.S.B.S.) is pleased to announce the 2nd International Conference on bridges, which will be held in Athens, on 16, 17 and 18 October 2014, entitled:

“Innovations on Bridges and Soil-Bridge Interaction” IBSBI 2014

CONFERENCE TOPICS

- Aesthetics and architecture of bridges
- Bridge monitoring
- Design methods
- Fabrication and construction
- High performance materials
- New materials and their application on bridges
- International codes on bridges and comparison-loadings
- Seismic behaviour
- Vehicle-bridge interaction
- Old bridges and maintenance
- Stone bridges
- Long-span bridges
- Special forms of bridges
- Floating bridges
- Pedestrian bridges
- Sky-bridges
- Geotechnical problems
- Soil-structure interaction
- Stability problems - types and analysis
- Auxiliary and connected sub-structures
- Prefabrication
- Erection
- Computational techniques
- Experimental research
- Isolation and damping systems
- Aeroelasticity
- Impact and explosion problems
- Multi-hazard loading on bridges

CALL FOR ABSTRACT

The Scientific Committee invites all participants wishing to contribute to the scientific program to submit an abstract for oral presentation. Abstracts must be submitted by the **deadline, January 10, 2014**. Abstracts received after this date will not be considered.

Submission of abstracts ibsbi2014@ntua.gr

If you experience any problem with the abstract submission, do not hesitate to contact us.

For more details, see also the conference website: <http://ibsbi2014.ntua.gr>

DEADLINES

Submission of abstracts	10/1/2014
Acceptance of abstracts	10/2/2014
Submission of papers	1/5/2014
Acceptance of papers	1/6/2014
Registration for authors	15/6/2011
Early registration for participants	30/8/2014
Late registration for participants	after 30/8/2014
