The Conference will take place in Athens (Eugenides Foundation). Athens is a city constantly inhabited since Neolithic Age, with glorious history, a birthplace for civilization, where democracy was born and relives through some of the world's most formidable edifices. The climate is one of the best in Europe, ideal for tourism. Everybody knows the Acropolis of Athens, a famous archaeological monument, which dates back to the 5th BC, the Golden Age of Pericles.

The capital of Greece is constantly inhabited since Neolithic Age. The 5th century was the time of its ultimate bloom, when moral values and civilization surpassed city limits and became the mother land of western civilization. In the centuries that followed, many conquerors tried to take over Athens. After the revolution of 1821, Athens was chosen, in 1834, to be the capital of the newly established Greek State. Today it is the political, social, cultural, financial and commercial center of Greece. In 2004, here were organized the Olympic Games.

Athens is a city of different aspects. One can visit the National Archeological Museum and the New Acropolis Museum and admire the unique treasures of Greek cultural inheritance.

On the other hand, around the Acropolis lie the famous neighborhoods of Plaka and Psiri, with the old neoclassical buildings of the 18th and 19th century. Here one can relax by visiting traditional taverns and small antique shops.

The capital is famous, more than any other European capital, for its nightlife. Athens by night totally changes.
